

REMARKS

In view of the extensive number of corrections required by the Examiner, a substitute specification is being provided along with a mark-up copy thereof from which the Examiner can see that no new matter has been added. The substitute specification corrects all of the errors noted by the Examiner and others found during a review of the specification, so that the objection thereto should be withdrawn, and since all of the claims have been allowed, formal approval thereof is requested.

While this application should now be in condition to be approved for issuance as a patent, in the event that any issues should remain after consideration of this response which could be addressed through discussions with the undersigned, then the Examiner is requested to contact the undersigned by telephone for that purpose.

Respectfully submitted,

By: _____
